# cloudyBoss accreditation cBX83

cloudyBoss cBX83 accreditation is specifically designed for cloudyBoss engineers specialised in the development and maintenance of complex meta systems.

The holder of a cloudyBoss cBX83 accreditation certificate has acquired and demonstrated skilfulness in a range of tasks pertinent to the activities routinely conducted by a cloudyBoss engineer, as assessed during his training period.

The range of skills contemplated by a cloudyBoss cBX83 accreditation and against which an accredited person has been assessed includes in-depth knowledge of:

- cB-BE application, underpinning technologies and configuration
- cB-FE application, underpinning technologies and configuration
- cB core technology stack general architecture and maintenance
- cB and non-cB API (application program interfaces)
- Solution architecture and integration technology

The range of verified pre-requisites skills and experience a person must possess prior to be able to gain a cloudyBoss cBX83 accreditation includes:

- Data science and advanced data modelling technics
- Cloud programming (both client and server-side)
- Advanced program/project management skills
- Application Programming Interfaces
- Machine Learning programming
- Message Oriented Middleware
- Agile methodologies and UML
- Multi-framework integration
- Object Oriented Programing
- Solution architecture design
